

28th International Labour Process Conference

March 15-17, 2010

WORK MATTERS

Call for Streams

During the past 2 years, the International Labour Process Conference has begun to incorporate streams into its conference timetables. While not a stream-focused conference, we have found that streams have been an important and intellectually stimulating aspect of our conference. We are formally setting forth a call for streams to be included in the 2010 Conference to be held at Rutgers University, USA.

Since streams only represent a portion of our conference, we cannot accept all streams that are proposed. To facilitate the acceptance process we are instituting a review process for potential streams. Acceptance of streams is based on a competitive process in which streams are evaluated based on 2 main criteria (in addition to the substantive focus of the proposed stream):

1. The focus of the stream will involve issues not generally covered in the range of topics of the Labor Process Conference. (see conference flyer for full listing of these topics).
2. The stream will attract scholars who may be new to the Labor Process Conference

Stream Proposal should include:

- Detailed description of the proposed stream (including title and key conveners)
- A discussion of how the stream will address the criteria for inclusion listed above

If you are interested in organizing a stream for the 2010 conference please send a proposal for that stream to Dr. Mary Gatta (gatta@rci.rutgers.edu) by June 1, 2009.

Streams for the Conference so far:

Worker Power and the Labor Process Past and Present:

Prof. Dorothy Sue Cobble, Rutgers University;
Prof. Peter Winn, Tufts University

Are Bad Jobs Inevitable?

Prof. Chris Warhurst, Univ. of Strathclyde;
Dr. Francois Carrre, Univ. Mass.-Boston;
Dr. Patricia Findlay, Univ. of Edinburgh;
Prof. Chris Tilly, UCLA

CALL FOR PAPERS

OPEN MAY
