

ILPC 2012

30th International Labour
Process Conference

Stockholm
University

27-29th March

The annual International Labour Process Conference is one of the longest established and best known forums for analysis of all aspects of work and employment, now celebrating its 30th anniversary. During its history, the conference has earned its reputation as a cornerstone of empirical research and cutting edge theoretical debate within the labour process and work organization tradition. Each year, the conference brings together academics, policy makers and practitioners from the sociology of work and employment, human resource management, business and management studies, industrial relations, organizational analysis and other disciplines to discuss and critically assess the development in the field.

We invite you to join a vibrant forum in Stockholm to discuss change and stability in contemporary working life. As previous years, the conference will include a pre-conference *workshop for doctoral students* and besides the general conference stream, a number of *special streams* and *symposia*.
